

ABSTRACT OF THE DISCLOSURE

A laminate web and several uses of the laminate web are disclosed. The laminate web comprises a first web, a second web joined to the first web at a plurality of discrete bond sites; and a third material disposed between at least a portion of the first and second webs. The laminate webs of the present invention are suitable for a variety of uses. Such uses include flexible carrying implement, medical applications, kitchen or bathroom implements, decorative coverings, home accent items, pet industry articles, fabric, fabric backings, edible materials, bedding applications, absorbent food pads, clean room wipes, tack cloths, and many other uses.
